Executive Summary

A pre-final year Computer Science Engineering student specializing in Cybersecurity at SRM University with a strong focus on backend development. Proficient in Python and Java, with hands-on experience building backend-driven applications using Django, relational databases, and RESTful concepts. Experienced in data structures, problem-solving, and developing practical software solutions. Actively seeking backend or software development internship opportunities.

Education

SRM Institute of Science And Technology, Ramapuram

August 2023 - May 2027

B. Tech – Computer Science and Engineering with Specialization in Cybersecurity

Skills

- **Languages** : Python, MySQL, HTML, CSS, Javascript, Java
- **Frameworks and Tools** : Django, NumPy, Pandas, Scikit-Learn , OpenPyxl , Tkinter
- **Backend & Databases**: RESTful concepts, CRUD operations, relational databases.
- **Technical Competencies**: Basic Linux, GitHub, Problem Solving, Data Structures & Algorithms
- **Soft Skills** : Communication, Problem Solving , Teamwork , Team Management

Projects

Expense Tracker

- Developed a sophisticated, feature-rich expense tracker application using Python, substantially improving personal financial management.
- Integrated the OpenPyxl library for seamless interaction with Microsoft Excel, facilitating robust data persistence and manipulation.
- Implemented complete Create, Read, Update, and Delete (CRUD) operations, guaranteeing comprehensive oversight of all expense records.
- Included an advanced category management system for meticulous classification of expenditure and the automated production of detailed financial summaries.

Medic - AI Powered Medical Symptom Checker

- Built medic, an AI-powered PWA for medical symptom checking with severity assessment and safety alerts.
- Developed symptom analysis logic with risk classification, OTC suggestions, and emergency warnings.
- Built a modern react frontend using React , Vite, and tailwind CSS with installable PWA support.

Certifications

- GeeksForGeeks - 160 days of problem solving
- Meta Backend Developer (Coursera)
- The Web Developer Bootcamp 2025 (Udemy)
